
ABOUT OUR ORGANIZATION

GreenLight Data Solutions, Inc. is an Information Technology solutions company, providing Information Technology (IT) consulting and project outsourcing for small to mid-sized companies. We differentiate ourselves by our professionalism, solid technical expertise, 25-plus years of experience and a quality oriented business philosophy.

We view our clients as partners. Therefore, we seek clients who recognize that technology can increase profitability and who understand the advantage of having a partner help identify and implement the appropriate technology solutions.

We aren't simply trying to sell a service. Our desire is to facilitate success by providing solutions to give our clients a competitive advantage in their respective market space.

OUR MISSION:

To develop, implement and service innovative, cost-effective IT solutions that meet each client's unique technical requirements and business goals.

IT SOLUTIONS**

WHAT WE DO...

GreenLight Data Solutions, Inc. offers expert evaluation of our client's needs and provides solutions to meet those needs. Our consultants can lead your enterprise smoothly through any IT implementation, large or small.

Our specialties include:

- Oracle database design, implementation, conversion and configuration from our "Oracle Certified Professional" consultants.
- Analysis, design, planning and implementation of small to large internal or external networks.
- Integration of new hardware and software into your existing infrastructure.
- Technical support and trouble shooting for your day-to-day operations.
- On-site and remote consulting services.
- Security policy evaluations and implementation. (HIPPA, Virtual Private Networks...)
- Wiring services for both voice and data

Turn to us when your organization needs a cost-effective IT solution. GreenLight Data Solutions, Inc. is ready to help you select and implement the right plan for your company.

NETWORKING SOLUTIONS...

No matter the size of your organization, your internal and external network should be scalable, secure and stable.

- Our consultants provide solutions to meet your current requirements and plans for your network to grow along with your company.
- We use the industry's leading firewalls, virus scanners and directory services to protect your data from both internal and external predators.
- We will design and implement the best available redundancies to help minimize network outages and keep your company working
- If you do not currently have an office network or need additional work areas, we'll wire your office for both data and voice. Additionally, secure wireless solutions are available.

DISASTER RECOVERY PROCEDURES...

Simple by name only, Disaster Recovery Plans can become a big headache for any company. Ask yourself "what happens if I lose my data?" This question can be answered in many ways but, the end result is lost time and lost money.

GreenLight Data Solutions, Inc. can provide a comprehensive and effective plan to help recover your business in the event of a disaster.
